**Holy Point**  
Academy

तमसो मा ज्योतिर्गमय

# PRINCIPAL'S MESSAGE

**Mr. PC Pandey**  
Director/Principal

With time flowing by in its own merry way and India being looked upon to be one of the foremost of nations to take the big leap forward very shortly, it is of utmost importance that the growing youth of the country is given special attention and that is what we vouch to deliver here at Holy Point Academy.

It is a no-brainer that the youth are the most treasured element of a country. We believe in every child's innate potentiality and sincerely endorse the fact that an ocean of possibilities lies within each of them which just needs to be given proper direction and guidance to get it going on track.

The astounding personalities and the glories achieved by our predecessors on the world stage are a testimony to the fact that there is no dearth of talent in our nation. In fact, there is a bundle of energy and abundance of abilities that runs in our blood.

What is important is just to give every child the confidence and back them. There is a plethora of opportunities that go begging many a time due to the lack of proper planning and implementation. Our focus is to play a major role in the development and fine-tuning of the youths of India who are going to take the nation forward in the future and at the same time give them the opportunity to rise to their potentiality and realise their own dreams as well.

We want all our students to be happy, well-adjusted and fulfilled, healthy in mind and body, and just as determined to contribute positively to society and the communities around them as to realise their own dreams. There are myriad activities with which they can engage, and tremendous pastoral care to support them in all that they do.

# VICE PRINCIPAL'S MESSAGE

**Mr. Pavan Chaturvedi**  
Vice-Principal

In 21st century, the responsibility of educational institutions has increased astronomically and the goal of providing quality education do has unforeseen great challenges. We have to train the tender minds so that they become resourceful and sensible citizens of the society and can not only adapt to but also lead the fast-paced changes in our world.

Beside imparting the required knowledge, we focus on the skill development and the concentration improvement. Supporting the views of Swami Vivekananda, we help each student form an unshakable character and cultivate his or her imagination. We do not confine ourselves to any one area of the knowledge and strive for a holistic approach towards the education.

We take utmost care to ensure that educational process at the school level does not become dull and drab. There should not be any strained seriousness on the faces of the young learners. Our teachers not only make education interesting for students, but also impart in them perfect blend of the traditional and social values.

With such vision and mission, we strive to mould every individual into a gigantic personality capable of moving the mountains of life.

# Mission and Vision

We are driven by the mission of providing standard and quality education to the students that would have a direct impact on their upbringing bringing out the best in whatever they do. We also look forward to build the students' character and personality from the inside out in such a way that they can become responsible citizens contributing substantially to the growth and development of their motherland.

*“We want that education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one's own feet.”*  
-Swami Vivekananda

## Why Us

It is important to analyze where your child's strength lies, and similarly it is also vital to dissect what are his/her weaknesses and how they can be overcome. Barring this, it is equally essential to figure out at a very early stage where his/her aptitude lies and how it can be harnessed to deliver maximum result. It is in this context that our institution plays such a pivotal role. With an experience of more than two decades in nurturing and dealing with students, our esteemed faculties can pick up very early your child's area(s) of interest and also those niche(s) in which they are lagging. Thus, it becomes very easy to further sharpen their strength areas and work on the weak links.

Moreover, with the kind of infrastructure we possess everything from A-to-Z works out extremely systematically. Special care is taken that the students don't get stuck at any point but move on into the drum-beat of life with utmost enthusiasm and passion.

The faculties are extremely qualified and have a lot of experience in academics in their respective niches under their belt. They are very friendly and with them the students can share any problem of their day-to-day lives without any hesitation, thereby facilitating a great student-teacher relation. All the faculties teach with intense zeal and are more than happy to give additional time for extra out-of-the-syllabus lessons especially to those students who are interested in the same and seek for that.

Many of the faculties also take part in sports and other extra-curricular activities along with the students and such system, somewhere down the line, definitely plays a part further strengthening further their relations with each other. Moreover, the bonding that is created while going on excursions together or while preparing for the Annual Function and similar such events, makes a fantastic understanding between the students and the teachers which have a positive impact when things again gets back to the routine stuff of teaching and learning in the classrooms.

The students are groomed in such a fashion that they learn to see things from the true and right perspective. Immense stress is laid on the moral development of the child. It is ensured that the competition amongst students to outdo each other in academics and other fields remain entirely healthy. Comparisons between students are something that we consider totally unjust and unfair and hence are never entertained under any conditions.

With world-class facilities, from classrooms to laboratories, from playgrounds to auditoriums and in everything in between we have created an institution that has got everything it takes to provide your child with the most favourable platform for full manifestation of the world of possibilities that lies in him/her.

# Our Campus

The campus of an institution really sets the tone of it and even more so when it is an academic institution like the school. Our campus is one with nature, encompassing acres of land and residing on the lap of nature itself. It not only covers a fascinatingly wide area but the structure is so built that between buildings there is sufficient space. The planning is so made that the most can be leveraged out of the entire campus area. Our purpose is to make every student feel at home on our campus and make it a place of beauty and serenity with top-notch focus on cleanliness for anyone who comes and makes a visit.

## Academics

Whilst being proud of the student's achievements in public exams, we want to go beyond the confines of exam specifications and encourage learning for its own sake. We want to stimulate the desire to challenge, query, question and argue; allowing our students to develop into outward looking youngsters who are ready for the trials of the wider world. With a broad and challenging curriculum taught by our high calibre teaching staff, we nurture resilience, confidence and aspiration.

### a. Kindergarten Program (PG to UKG):

The Kindergarten program employs the “integrated learning” methodology. Under this, young learners are able to grasp varied concepts through practical application, across a range of subjects. For example, they have at their disposal smart classes, games which acts as an add-on to their learning models.

### b. Primary Years Program (I to V):

The Primary Years Program curriculum framework consists of five essential elements: concepts, knowledge, skills, attitudes and action. The programme emphasises learning through active inquiry and aims to develop an all-round child to meet certain competencies and attitudes. It is a set of ideals that can inspire, motivate and focus the work of schools and teachers, uniting them with a common purpose.

### c. Junior Years Program (VI to VIII):

In the Junior Years Programme, students work towards the senior program and develop emotionally, physically and intellectually. They are encouraged to demonstrate emotional strength, develop personal skills and form their own sense of moral values. With guidance, students become aware of themselves and their place in the school and in the society. The Junior Years curriculum at Holy Point has been planned and compiled based on the structured, student-centred and inquiry-based foundation laid during primary years.

d. **Senior Years Program (IX to XII):**

The Senior Years Program curriculum offers a variety of routes such as Mathematics, Biology and Commerce stream, for learners with a wide range of abilities. Encouraging learners to engage with a variety of subjects, and make connections between them, is fundamental to our approach. The programme helps improve performance by developing skills in creative thinking, enquiry and problem solving. It is the perfect springboard to advance study. The programme develops learner knowledge, understanding and skills in:

- Subject content
- Applying knowledge and understanding to new as well as unfamiliar situations
- Intellectual enquiry
- Flexibility and responsiveness to change
- Working and communicating in English
- Influencing outcomes
- Cultural awareness

## Examinations and Promotions:

There are three periodic assessment and two terminal examination conducted during the academic year. Out of three, two periodic assessments will be held in pre midsession and remaining one will be held post midsession whereas terminal examination will be held in September and March respectively. Beside these, a series of monthly test, class test, assignment & project works are given & evaluated in all the classes. Promotion to the next classes is granted on the basis of the whole year's work, continuous & cumulative test throughout the year.

## Guardians-Teacher meetings

The school very well understands the importance of proper communication with guardians to make sure that the students are on the right track. The school regularly holds Guardians-Teachers meetings. Also, the school invites every guardian to visit and have a look at the answer sheets of their child/children and collect the mark sheet(s).

Also, guardians are free to visit school and meet Principal any time for casual meetings. However, school do not support the practice of talking with teachers directly without taking the consent of Principal.

## Career Consulting

We take special care to identify the innate tendencies of a student as to which field(s) attracts him/her the most and where he/she can excel judging by his/her performance and aptitude. We have gotten career counsellors with expertise in career consulting who can comprehend and quickly catch the mind-set of the students, thereby analyzing perfectly which stream or course of study would be apt for them. For those students who are facing difficulties in studies owing to some reason(s), career counsellors can do wonders as they help them out in getting their focus back by overcoming the barrier.

# Yoga Meditation

Physical Education has been an integral part of the education set-up, but more so now than ever before. Modern educational system has witnessed a revelation where the significance of Physical Education has grown tremendously. Yoga classes, PT, Sports, etc. are something that a child needs and genuinely deserve which can or rather does have a big role to play in his/her eventual overall development. We at Holy Point Academy give Physical Education a massive magnitude of importance as we sincerely believe

that Physical Education is as necessary as conventional education when it comes to the full-fledged and overall development of the students in the long run. We have got great infrastructural facilities when it comes to having a separate area for conducting Physical Education, yoga and meditation classes. In order to encourage students to take part in Physical Education, periodic competitions are held too besides the grand Annual Sports. All in all, no stone is left unturned to ensure that there is always voluntary participation from the students of all classes.

## Beyond Academics:

For holistic development of the students the school organizes a lot of extracurricular activities. Every year it holds an annual concert & Sports day. Maximum number of students are encouraged to take part in these events to develop their self-confidence and athletic thought process of never accepting the defeat.

The school is divided into four houses: Krishna, Kaveri, Ganga and Saraswati. The students are encouraged to participate in various inter-house competitions such as painting, debate and declamation, dance and dramatics, social service etc. The students are also encouraged to participate in inter-school competitions which provide students an opportunity to interact with students from other schools and learn to maintain a healthy, and competitive yet collaborative mentality with them.

There are various courts catering to different sports like Basketball, Badminton, Volley Ball, Tennis, etc. and a large playground where students can play Cricket and Football. As far as indoor sports are concerned, school has facilities to learn Table tennis, Carrom, Chess, etc.

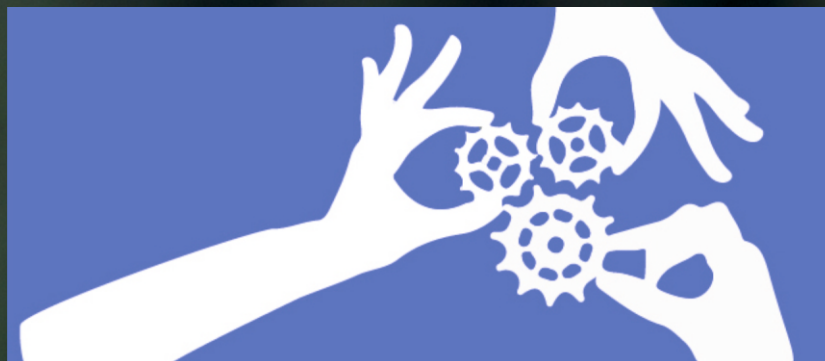

# Experiential Learning Opportunities

## Library

The school has a beautiful library having a wide variety of books and covering an even wider gamut of subjects and topics. This gives the students the ideal opportunity to know about the outer world in their spare time. Not only is the collection limited to great books of contemporary and modern era but everyday newspapers, various journals and magazines too are kept there to enrich the students' mind with knowledge and day-to-day happenings from around the world. The school encourages students to visit the library on a routine schedule and at regular intervals.

## IT Labs

The IT laboratories of the school are truly outstanding. The set-up has been made in a totally planned way. These remarkable IT labs consist of top machines in the form of most upgraded computers of modern times that even further encourage the students who work on them. Our IT Labs provide the students with absolutely full and free access to the system so that they can leverage the very best out of them.

## Science Laboratories

For proper retention of any kind of knowledge practical learning is an essential process. For this presence of laboratory experiment and examination in school curriculum is inevitable. We have prepared and maintained the most modern set of laboratories for providing the students with best facilities to understand the subject and be efficient with its operation in the practical domain.

The chemistry laboratory is well equipped with most modern and secured apparatuses and with A-graded chemicals. The apparatuses in physics laboratory are well calibrated and are very much mechanically and electronically sound. The biology laboratory is well equipped with modern dissection boxes and observation apparatuses and the experiments are carried on plants and animals (if any) permitted by authorized organisations. All the procedures are done under complete guidance and vigilance of the teachers and staffs but with full freedom to the student to operate in the laboratories.

# Transport Facility

Transportation is very vital in a student's life to participate fully and with enthusiasm in the curriculum of education and other activities for betterment of his or her physical, mental and spiritual levels. Holy Point Academy provides for all purpose daily transport to students and staffs with pick up and drop school bus services. The perimeter of operation for the bus service is quite wide to facilitate transportation to everyone. The fleet of buses vying for the school is well maintained, properly secured and are driven by well trained and veteran drivers. Every bus is staffed well by a driver and helper duo. The students are picked up and dropped at preordained spots and a strict norm of discipline is maintained in the bus by bus captain and travelling teachers (if any).

# Boarding Facility

The need to establish a residential facility was felt soon after the inception of school more than a decade ago. Many guardians employed in Govt. or private sector lives in areas where trustworthy educational institutes rarely exist. Numerous requests from such guardians for launching a residential facility started flooding the office.

Their wish became our commitment and we launched a residential facility. We now provide quality education in an atmosphere suitable for all round development. Residential facilities consist of spacious air cooled rooms, mess, and other infrastructure. Along, residential students enjoy the sports facilities in the evening in the supervision of experienced instructors to keep themselves physically fit. Moreover, evening classes are provided for extra support in the academics. Besides, a disciplined daily routine, regular medical check-ups, focused career counselling, educational tours and numerous others opportunities available exclusively for residential students make sure that students grow holistically and become a healthy, self-confident, intelligent, and street smart individual.

It's a wonderful experience studying here at the Holy Point Academy. The teachers are highly knowledgeable and cooperative guiding us at every step. It is their intense eagerness to make us do better automatically urge and brings out the best out of us.

### **SHILPI VERMA XI**

The liberty given to us at our school to pursue our dream and the kind of encouragement we receive from our teachers irrespective of the result is what truly makes Holy Point Academy stand out.

### **AKSHAY GUPTA X**

My school has given me a lot. It has taught me many real-life lessons. I consider myself really fortunate to be studying in an institution as great as this. I enjoy every bit of my moment spent here.

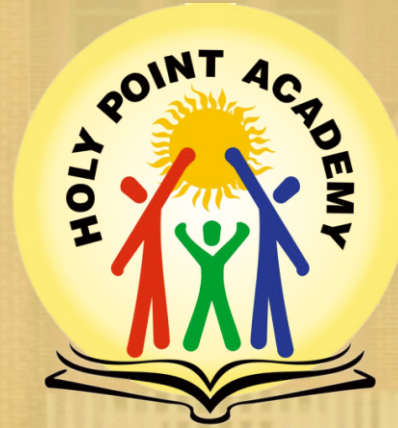

### **HARSH RAJ ANANAD XII**

The best part of my school is perhaps the fact that it makes education enjoyable to us and not a burden by any means. It is an institution within an institution so to speak. I have already had some fabulous memories of my school which I would cherish all lifelong.

### **CHARCHIT DIXIT V**

Everything in my school is so organised and planned that I do not face difficulty in anything at all. Our school is indeed an institution par excellence where each and every aspect is meticulously looked at. I am extremely proud to be a part of this entire set-up.
